

Chatbot Arena LLM Leaderboard: Community-driven Evaluation for Best LLM and AI chatbots

[Twitter](#) | [Discord](#) | [Blog](#) | [GitHub](#) | [Paper](#) | [Dataset](#) | [Kaggle Competition](#)

Chatbot Arena is an open platform for crowdsourced AI benchmarking, developed by researchers at UC Berkeley [SkyLab](#) and [LMarena](#). With over 1,000,000 user votes, the platform ranks best LLM and AI chatbots using the Bradley-Terry model to generate live leaderboards. For technical details, check out our [paper](#).

Chatbot Arena thrives on community engagement – cast your vote to help improve AI evaluation!

New Launch! WebDev Arena [gish.lmarena.ai](#) | AI Battle to build the best website!

*Rank (UB): model's ranking (upper bound), defined by one + the number of models that are statistically better than the target model. Model A is statistically better than model B when A's lower-bound score is greater than B's upper-bound score (in 95% confidence interval). See Figure 1 below for visualization of the confidence intervals of model scores.

Note: in each category, we exclude models with fewer than 300 votes as their confidence intervals can be large.
