	I have three instances of Logseq. Apple, Linux, Android. I have 2 graphs, Personal and Work. Personal syncs correctly across all three apps. Work syncs correctly between Apple and Linux. However, the Android app doesn't sync all files. It says "Everything is synced!" but even looking at the filesystem I can see that there are missing journal markdown files. In fact the last file Android has synced is ...

What Happened?

excalidraw seems to have an issue with moving blocks... specifically if i move it from a journal entry to another block - inside a whiteboard specifically in my case - the pic is erased Since I am not sure if I want to move blocks I would rather not use it as of now, then

Reproduce the Bug

1. open excalidraw
2. make a drawing
3. move the block of it to another page

Expected Behavior

What Happened?

In the Logseq Android app, when trying to create a new account, the in-screen keyboard does not stay open. It disappears automatically within a second every time I attempt to use it. As a result, it is impossible to create a new account using the Android app.

Reproduce the Bug

1. Open the Logseq Android app.
2. Tap the "☰" icon located at the top-right corner.
3. Navigate to the "Features" ...
